2.3.4. proizvodi.html

Na stranici proizvodi.html prilikom učitavanja stranice vrši se dinamičko kreiranje i ispisivanje checkboxova. Takođe učitavaju se i prikazuju proizvodi iz JSON fajla preko AJAXA. Klikom na sliku, naziv ili polje „VIEW DETAILS“ vrši se redirekcija na stranicu specifikacije.html i učitava se izabrani proizvod. Glavna funkcionalnost ove stranice je filtriranje proizvoda po zadatim uslovima.

2.3.5. specifikacije.html

Ovoj strani se pristupa jedino preko strancice proizvodi.html i to kada se klikne na određeni proizvod. Klikom na proizvod vrši se redirekcija na specifikacije.html i iz JSON fajla se preko AJAXA ispisuje naziv, učitavaju se slike (koje se prikazuju kao galerija kada se klikne na sliku, preko FancyBox 3 plugin-a) i ispisuje se specifikacija za taj proizvod. Glavna karakteristika ove strane je da se detaljnije opiše izabrani proizvod (slike iz više uglova i detaljna specifikacija proizvoda).
